

IQVIA Biotech in JAPAC services

IQVIA Biotech in Japan and Asia-Pacific (JAPAC) provides comprehensive, flexible and fit-for-purpose clinical and commercial solutions specifically designed to meet the regional and global aspirations of dynamic and fast-moving emerging biotech and biopharma companies.

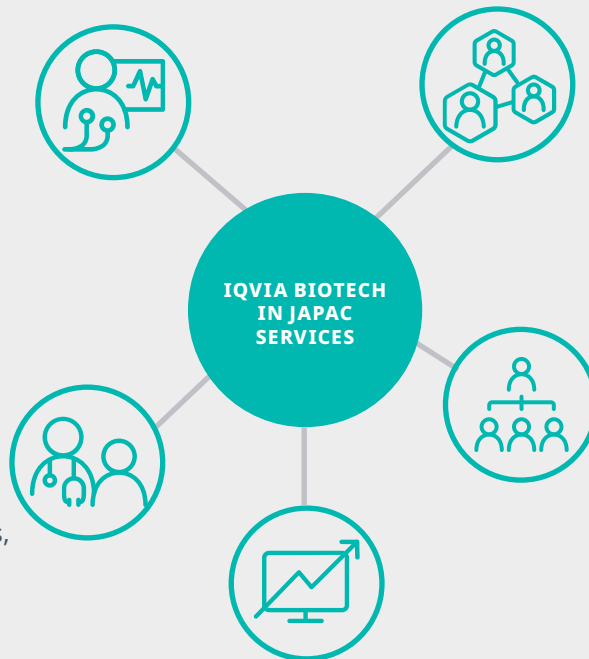

We are headquartered in Singapore with specialist teams in 15 countries to provide technology-enabled services and custom-built delivery solutions to accelerate results and achieve clinical development milestones for improving patient outcomes.

Clinical development experts

Flexible models, therapeutically-aligned teams, and dedicated resources in transparent partnerships, with instant access to world-class data and analytics that are critical in driving decisions throughout the JAPAC drug development process.

Specialist teams

Simplified operating procedures, custom-built delivery models for reduced complexity and specialized teams working in an agile way for emerging biotech and biopharma companies to reach their clinical and commercial milestones.

Intelligent connections

Harnessing unparalleled data, advanced analytics, innovative technologies, and domain expertise to derive insights for smarter decision making and unleashing new opportunities.

Full service support

Seamless support across the development lifecycle beyond clinical development, including asset valuation and due diligence, drug development strategy and analytics, launch strategy and planning, as well as commercialization and lifecycle management.

Compelling results

Delivery of compelling results to all stakeholders through milestone achievement, ultimately improving health outcomes for patients.
